Have a seat.

Sitting is a *Disease*?

"For people who sit most of the day, their risk of heart attack is about the same as smoking."

...Don't get too comfy.

- Stand or Walk during phone calls.
- Set a timer on your computer every <u>hour</u> to take a walking break.
- "Walk with me." Replace a quick email for a quick walk with someone.
- Goodbye chair, hello ball. Swap your chair for an exercise ball after lunch. Eventually work up to sitting on the ball the whole day.

50% - 70% of people spend <u>6 or more</u> <u>hours</u> sitting a day. Be the change and get off that seat!
