

Think Positive

CHALLENGE

Train your brain to think positive

Requirements to complete this HEALTH CHALLENGE™

1. Read “Think Positive.”
2. Create a plan to think positive daily.
3. Keep a record of your completed health challenge in case your organization requires documentation

Olympic skier Jackie Wiles topped 80 miles per hour on a downhill course in a World Cup Race. She hit turn after turn perfectly using her skis, poles, and body.

A week later, she was racing against the

best downhill skiers in the world. And then something happened.

At the peak of her career as a world-class athlete, Wiles lost her balance. She spun out of control and veered off course.

When race officials reached her on the snow-covered slope, she couldn't walk. The impact tore ligaments, broke two bones in her leg, and caused other injuries.

Even before surgery, Wiles knew she had a choice. Give up, quit skiing, and do something else. Or focus on getting better and stronger to ski like a pro again.

What would you do? Dwell on the negative or focus on the positive?

Positive thinking can actually improve your mood, support good health, and help you live longer. Give it a try. Take the month-long health challenge to Think Positive.

Giving thanks can make you happier

The Power of Positive Thinking

Fact or fiction: Is positive thinking good for your health. Take the quiz to find out.

T F

1. People with a positive outlook on life have a lower risk of heart disease than those who focus on the negative.
2. Stress and negative thinking don't really impact blood pressure.
3. A little exercise or meditation can boost your mood and help you feel better.
4. People who focus on the positive tend to live longer and have a lower risk for chronic disease than those who don't.
5. Positive thinking improves brain function, memory, and problem-solving skills.

How did you do? Skipping breakfast might save you calories. But if you don't have a plan, you're more likely to eat junk food later. Not all oatmeal and cereals are the same. Some are loaded with sugar and empty calories. Starting the day with a healthy breakfast can have a positive impact on your health.

Answers: 1. True 2. False 3. True 4. True 5. True.

9 Health Benefits of Positive Thinking

After the ski slope crash, Jackie was taken away on a stretcher. She needed surgery to repair torn ligaments, broken bones, and damage to her knee. Then came physical therapy. Every step of the way to recovery, she's focusing on the positive.

“Scars tell stories and show what I've been through and the strength from within,” says Jackie. “I'm going to come out stronger from this.”

And she did. She recently competed in the 2022 Winter Olympics in the Women's Alpine Skiing Downhill event.

It's good to focus on the positive or look on the bright side, even when things go wrong. It can improve your health and quality of life in many ways, such as:

- Lower the risk for heart disease¹
- Help you live longer²
- Bounce back from negative events faster
- Improve well-being and quality of life³
- Support and protect the immune system⁴
- Reduce blood pressure⁵
- Supports healthy relationships⁶
- Protect brain function and memory as you age⁷
- Reduce worry, stress, anxiety, and depression⁸

The Optimistic Outlook: 8 Ways to Think Positive

Are you already an optimistic person? Keep up the good work. But what if you tend to focus on the negative, or catch yourself thinking the worst? Practice positive thinking. Here are 8 ways to develop a positive mindset:

1 Start your day with positive thoughts. When you wake up, do you start worrying about everything on your to-do list and what could go wrong? Stop. Start your day with a positive thought like: “Today is going to be a great day.”

2 Be grateful. It’s another way of saying, “look for the positive.” For example, when you’re stuck in traffic, be grateful for extra time to listen to your favorite song or podcast.

3 Keep a gratitude journal. Take a few minutes each day to write down a few things you’re grateful for. Even little things matter, like clean air, a beautiful sunset, or all green lights on your way to work.

4 Laugh more. It’s a great way to boost your mood, feel happier, and be more positive. Read or listen to funny jokes. Watch a comedy. And look for humor, even in difficult situations. When you laugh, endorphins are released in the brain that help improve your mood.

5 Make time for exercise. Aim for 30 to 60 minutes a day. Break it up into smaller chunks of time if that fits your schedule better. Go for a walk. Ride a bike. Hit the gym. Take a fitness class. You’ll feel better, think better, and be more positive.

6 Learn from failure. When something doesn’t turn out the way you expected, it’s easy to focus on what went wrong. Change the way you think about failure. Turn it into a learning opportunity. Inventor Thomas Edison said: “I have not failed 10,000 times. I have not failed once. I have succeeded in proving that those 10,000 ways will not work.”

7 Stop, think, choose. Pay attention to what you say and think. When you catch yourself making a negative statement or comment, Stop. Think about what you’re saying. And Choose to reframe it with a positive statement. Here’s an example: **Stop:** I’ll never be able to eat a healthy diet. **Think:** That’s not true. I just ate a cookie, but I eat healthy foods, too.

16 more ways to think positive

Choose: I’m working on eating a healthier diet. I’ll make better choices next time.

8 Surround yourself with positive people. You may not be able to avoid Debbie Downer or Bob Bummer if they’re your co-workers or part of your family. But you can surround yourself with positive people. Being around people with a positive outlook will help you learn to think this way, and avoid dwelling on the negative.

Positive thinking won’t solve all your problems or turn your life into a magical fairy tale. But it can improve your physical and mental health, help you live longer, and feel happier. And that’s something to be grateful for.

Think positive...
live longer

Think Positive

CHALLENGE

Train your brain to think positive

Instructions

1. Post this calendar where you will see it daily (bathroom, kitchen, bedroom, or add to your digital calendar).
2. Create a plan to think positive daily.
3. Use the calendar to record your actions and choices to think positive.
4. Review your progress at the end of each day, week, and at the end of the month. Then keep up the practice for a lifetime of best health.
