

In Ask Your Angels, Alma Daniel, Timothy Wyllie and Andrew Ramer say, “Until recently, we’ve been focusing on seven major chakras in our bodies. But as we evolve and grow closer to the angels, a new chakra is awakening within us. We are calling this the Thymus chakra. It is found midway between the Heart and Throat chakras. Just as the angels are open to all of life, this new chakra will support us as we learn to open more and more to each other. It is also connected to the thymus gland, a major part of the immune system. Awakening this new chakra will boost our immune system and assist us in dealing with cancer, AIDS, heart disease, stroke and other diseases.” Shown another way, including details on the Thymus Chakra:

Chakra	Root Muldhara	Sacral Svadhithana	Solar Plexus Manipura	Heart Anahata	Thymus Atma	Throat Vishudda	3 rd Eye Ajna	Crown Sahasrara
Color	Red	Orange	Yellow	Green (s/times pink)	Aquamarine	Blue	Indigo purple	Violet-white
Element	Earth	Water	Fire	Air	Ether	Sound	Light	Information
